

CS 4501 Fall 2015 Assignment 1 Snapshots

Refer to this document for various sample displays of the required functionality of Assignment 1. Refer back to the Assignment 1 document for the complete assignment specifications.

```
2015-05-26^11:00|13:00|14:00  
  
2015-05-27^10:00|15:00|16:00|17:00  
  
2015-05-28^13:00|14:00
```

Figure 1. Sample "schedule.txt" file. Note the format of each line, with the ^ as the delimiter between the date and the list of times and the | as the delimiter between the times. Note also that time is using a 24 hour clock.

```
Count Rugen^2|4|6  
  
Man in Black^0|1|3|4|6  
  
Inigo Montoya^2|6|7|8
```

Figure 2. Sample "users.txt" file. Note that the use of delimiters here is similar to that of the "schedule.txt" file above. Each numeric entry is an index for a timeslot, where the slots are indexed starting at 0 in the order that they are stored in the "schedule.txt" file. Thus, timeslot 2 is 2015-05-26 at 14:00, timeslot 4 is 2015-05-27 at 15:00 and timeslot 7 is 2015-05-28 at 13:00.

Count Rugen				✓		✓		✓		
Man in Black		✓	✓		✓	✓		✓		
Inigo Montoya				✓				✓	✓	✓
	New									
Total		1	1	2	1	2	0	3	1	1

Figure 3. Initial site view based on the "schedule.txt" and "users.txt" files above. Your program may assume that the "schedule.txt" file always exists, but it should NOT assume that the "users.txt" file exists. Your formatting does not have to exactly match that shown above but it should be reasonable and clear. For formatting PHP dates see the date() function.
